18. (Currently amended) A device for documenting medical findings of a physical examination, the device comprising:

a electronically readable media for storing instructions; a processor, associated with the ~~memory~~ electronically readable media[[;]], that executes the instructions; and the instructions comprising:

instructions for displaying a first interface including a graphical representation of anatomical features based on the graphical representation of anatomical features information;

instructions for accepting from a user a first selection ~~from the~~ of an anatomical feature information;

instructions for displaying a second interface including medical information in response to the step of accepting the first selection;

instructions for accepting from the user a second selection from the ~~diagnostic medical~~ information; and

instructions for combining the first and second selections to derive at least one medical finding.

19. (Currently amended) The device of claim 18, ~~wherein the instructions for displaying anatomical information comprising displaying graphical representation of anatomical features includes a graphical representation of a plurality of body locations.~~

20. (Original) The device of 19, wherein the first selection comprises a response indicative of one of the plurality of body locations.

21. (Canceled)

22. (Canceled)

23. (Currently amended) The device of claim 18, the instructions for displaying ~~medical information~~ the second interface comprising displaying a plurality of medical problems conditions associated with the first selection.

CUSTOMER NO.  
34456

24. (Currently amended) The device of claim 23, the instructions for accepting the second selection comprising instructions for accepting a selection from the plurality medical ~~problems conditions~~.
25. (Currently amended) The device of claim 18, wherein the instructions for displaying ~~anatomical information the first interface~~ and the instructions for displaying ~~medical information the second interface~~ effect different views.
26. (Currently amended) The device of claim 18, the instructions for displaying ~~anatomical information the second interface~~ comprising instructions for displaying a ~~smaller second graphical representation~~ of a portion of the ~~anatomy anatomical features~~ with higher detail in response to ~~[[a]] the first selection~~ by the user indicating the portion of the anatomical ~~features information that is to be displayed explored~~.
27. (New) The method of claim 9, wherein the second interface includes a drill down button.
28. (New) The method of claim 9, wherein the second interface includes a change system button.
29. (New) The method of claim 28, further comprising displaying a list of systems associated with the first selection in response to a user selection of the change system button.
30. (New) The method of claim 9, wherein the second interface includes a procedure button.
31. (New) The method of claim 30, further comprising displaying a list of procedures associated with the first selection in response to a user selection of the procedure button.

CUSTOMER NO.
